LG

The hand crafted mahogany neck of the LG sits in a deep pocket in the mahogany body. This crucial connection provides excellent energy transfer between neck and body. Pulling the strings through the body increases resonance even further. In other words, this is one lively guitar. The pickups and bridge are also recessed into the body to achieve a very comfortable position for your right hand. Inspired by classic, all-mahogany electric guitars, we equipped the LG with two Seymour Duncan SP-90 single coil pickups. The 24 3/4" scale enhances the LG's bottom end and playability. Blues and Rock players looking for a smooth sounding guitar should check out the LG.

Specs
