Multiac Grand Concert SA, *Two Voice*

The Multiac Grand Concert is the Multiac for those players looking for a more traditional classical guitar feel. This is achieved with a design that unites a larger body with a Solid Cedar top and a neck that joins the body at the twelfth fret. The 2" width at the nut is slightly larger than the standard Multiac and more typical of the classical tradition. The result is the ultimate guitar for classical players that require amplified sound.
